

Biosecurity Information

Participants must familiarise themselves with the symptoms of Avian Influenza and other notifiable diseases and should take all reasonable steps to minimise the risk of spread of such diseases through adopting pro-active biosecurity measures.

Before entering the show, participants must:

- Not enter if the place of origin of the birds is within an of the UK which is under restrictions relating to notifiable avian disease (including Prevention, Protection and Surveillance zones)
- Inspect the health of all birds at the place of origin before departure
- Not move birds if there are any signs, or suspicion of any disease
- Transport birds in clean solid-bottom and sided carriers
- Use clean bedding material at the start of the journey, on the date of departure, which must be contained within the carrier at all times.

On arrival to the gathering, participants must:

- Present themselves visibly clean, free from faecal, contamination, feathers, or other bedding matter with unsoiled footwear, or over-boots
- Ensure their birds remain isolated from all other birds, until each has been inspected by a steward
- Present each bird for a health inspection before entering the gathering
- Be prepared to surrender any bird that fails the initial health inspection into isolation for a further examination by a veterinary surgeon, or in the case of suspected Avian Influenza, an APHA veterinary inspector
- Assist in the clean-up of any spilled bedding (from carriers) immediately by double-bagging and spraying with an approved disinfectant for use against poultry diseases – supplied by the poultry gathering organiser

At the end of the gathering participants must:

- Remove all their poultry and carriers from the gathering venue, back to the premises of origin
- Inspect each bird for signs of ill health, notifying the gathering organiser and/or poultry expert if disease is suspected
- If disease is suspected, isolate those birds for a veterinary inspection and if Avian Influenza is suspected APHA must be notified immediately (as per the organiser's Contingency Plan)
- In the case of suspected Avian Influenza, no birds should leave the premises until an APHA veterinary inspector has permitted the removal.

On Return to the place of origin, gathering participants must:

- Inspect the general health of all birds before removing from the carrier
- Notify the gathering organiser if ill health or disease is suspected
- Isolate birds returning to the place of origin for a minimum of one week, observing their health throughout that time
- Dispose of waste material from the carriers, ideally through heated composting for a minimum of 42 days then applied to land as fertiliser
